Subject: Microsoft Settlement

The DOJ settlement is NOT in the U.S. public's best interests, as dictated by the 500,000 poll we have taken, representative of an est. 87% of the concerned U.S. public -- an unequivocal majority of the concerned U.S. public input.

There is a series of legal networks that will file suit against the DOJ if the current appeasement settlement goes through.

This will cost the U.S. government an additional estimated \$1.6 billion dollars, which is also not in the public's best interests.

Please take this cautionary note seriously. You are making a major mistake with the current "settlement".
